Identify the coordination of supports, resources, and strategies for the members treatment including family input. Are other service providers ensuring services and clinical treatment modalities augment each other for optimal outcomes? Has a transition plan been developed? Have the persons strengths and needs been identified and integrated into treatment? Has there been any changes to medications or an increase in incidents that may require an adjustment of treatment? Is communication maintained among all team members including family members? Has discharge planning been discussed and documented? Has a transition plan been developed for individuals who are coming up on the waiver's maximum age limit?

What was the presenting issue? What de-escalation techniques were used in this situation? What other issue resolution support was provided? What other services and resources will you link the person receiving services and their family with as a result of the issue? What will be communicated to the in-home family therapist and in-home family support worker about the events that transpired? Service must result in the development of a stabilization plan for any additional services that are needed to resolve the immediate situation and follow-up communication must occur with the in-home family therapist. Follow-up must also be made with the individual's case manager to ensure consistency and treatment congruency among all services.
